## **REFERENCES**

Available upon request.

## **PARTIAL LIST OF MY CUSTOMIZED PROJECTS (PHP LAN BASED SYSTEM)**

### **Echo Pass IP Phone Inventory**

The Echo pass IP Phone Inventory Tracker will be used by the IT Team to add all information needed on each IP Phone, to track where it was located and who is the assigned person who will use the said IP Phone. This will help them to easily manage their IP Phones as well as easily tracking for configuration and report generation.

### **MSA Tracker**

The MS Tracker will be used by the Supervisor/TL/SME to assign cases on their Case Admin and Writers. The program will be used also to track all their cases as well as generation of reports for billing purposes.

### **Concentra Tick Sheet Tool**

The Concentra Tick Sheet Tool is used by the editors to count the number of errors in the transcriber's notes done by their medical transcriptionist for their error checking process.

### **Employment Movement Notice Tracker**

The Employee Movement Notice Program will be used by the Department Heads to fill out the necessary information for the employee movement. The program will automatically notify the Human Capital Division once the new request was endorsed and ready for approval.

### **AR Research Tracker**

The AR Research Tracker will be used by agents to add all information needed in the tracker and allow them to generate report at the end of the day.

**MT Typing Software** The MT Typing Software is a program used to measure two things in typing, speed and mistakes by MT Trainees. The system involves the Medical Terminologies from different body system. The system calculates the speed in words per minute (wpm) within the designated time.

### **Licensing Requirements Guidelines**

The Licensing Requirements Guidelines will be used by the Licensing Team to inform the user for the needed qualifications and license requirements per State. This will be the basis also to inform the user if they have an update regarding the needed license requirements.

### **UM Break Tracker**

The Break Tracker is used by the agents their login tool. This will help the supervisors monitor the login time and break schedules of the agents.

### **SIU Tracker**

A program used by the CCR Nurse Reviewer to add all information for each review such as member name, type of case, etc. The purpose of this tracker is to track the actual work done for billing purposes.

### **File Name Checking System**

It is used to check the name of the file based on the standard naming convention format. This system ensures that all file names are correct and follow the standard naming format.

### **Time Schedule Tracker**

it is used to track all the schedules and login time of the employees to know who will qualified for the raffle system based on the updated schedules and login time

### **Attendance Raffle System**

This will automate the randomly selection of employees which is qualified in the raffle.

### **Concentra MT Assignment Tracker**

A tracker used by the team leader/supervisor to assign the new voice record files from Web shuttle to medical transcriptionists.

### **Quality Assurance System**

The Quality Assurance System is a program used to create a scorecard linked to ranking and trending (generation of reports) that will be used by the QA for their quality assurance scoring practices. It is a program that will create easy access and workflow for the team and eliminates security and confidentiality issues. This system will use by the QA as their program monitoring for Voice and Data Audit. This will be used also by QA Admin to create or update QA Form depends on the business needs.

### **CTUR Break Tracker**

The Break Tracker is used by the agents their login tool. This will help the supervisors monitor the login time and break schedules of the agents.

### **AIS Tracker**

it is used to track all the review cases done by their Nurse and Quality Reviewer. The tracker has a capability to track the time spent done per review cases.
